MPI STARTER KIT
Ethernet-MPI-Profibus Adapter + OPC Server MPI EC1 + FREE system
SCADA HMI - Aspic 3.30 for 100 I/O

This sales package helps you to get process data out of the MPI device (e.g. Siemens Simatic S7-300, S7-400) and configure them in the OPC Server MPI EC1. What is more, you get the SCADA HMI system Aspic 3.30 to visualize and control your data **for FREE**. No additional software or hardware is required.

Since you configure MPI data in the OPC Server MPI EC1, you can immediatelly use this data in standard industrial communication protocol - OPC on Local PC/within Network for further data processing - for example in our system for process visualization and control - Aspic 3.30, Aspic MP or any other OPC-Client system.

In order to start monitoring and control your MPI data, we give you our system for process visualization and control - Aspic 3.30 for max 100 I/O (includes an external and internal data points) **for FREE**. You can start immediatelly monitoring your data, archive them, add alarms, see trends, generate reports etc.

If you are happy with the Aspic 3.30 system and want **to configure more I/O**, we give you **10% discount** for upgrade to one from following Aspic 3.30 versions: for 200 I/O, 1000 I/O, 2000 I/O or unlimited number of I/O.

Product price list

MPI Starter Kit (Ethernet - MPI - Profibus Adapter S7++ + OPC Server MPI EC1 + SCADA HMI system Aspic 3.30 for 100 I/O)

Price:	**780 €**
Availability:	max 4 weeks
Code:	820-04-BB

One company is allow to buy only one MPI Startet Kit and only once. Further purchases must be purchased separately - Adapter MPI/PROFIBUS S7++ order + OPC Server MPI EC1 order + Aspic 3.30 order.

Delivery Includes:
    IBHLink Adapter S7++ (MPI/PPI/Profibus DP-Ethernet 12Mbaud)
    Ethernet cable for direct computer connection or net connection
    CD ROM with software drivers
    Aspic 3.30 - single computer licence for max 100 I/O
    OPC Server MPI EC1 - single computer licence
    Two (2) hours technical support via phone or e-mail

MPI Starter Kit (Ethernet - MPI - Profibus Adapter PLUS (with PG socket) + OPC Server MPI EC1 + SCADA HMI system Aspic 3.30 for 100 I/O)

Price:	**860 €**
Availability:	max 4 weeks
Code:	820-04-BP

One company is allow to buy only one MPI Startet Kit and only once. Further purchases must be purchased separately - Adapter MPI/PROFIBUS-Ethernet order + OPC Server MPI EC1 order + Aspic 3.30 order.

Delivery Includes:
    IBHLink Adapter with PG socket (MPI/PPI/Profibus DP-Ethernet 12Mbaud)
    Ethernet cable for Hub or Switch connection
    An external power supply 24V DC required !
    CD ROM with software drivers
    Aspic 3.30 - single computer licence for max 100 I/O
    OPC Server MPI EC1 - single computer licence
    Two (2) hours technical support via phone or e-mail

Ethernet - MPI - Profibus Adapter S7++

If you bought the MPI Starter Kit or only OPC Server MPI EC1 and you want to create further Ethernet connection with MPI devices, we can offer you additional purchase of Ethernet - MPI - Profibus Adapter S7++.

Price:	**500 €**
Availability:	max 4 weeks
Code:	820-02-B

820-02-P

Intended only for owners of OPC Server MPI EC1 licence – possibility to buy 1-3 pcs of Ethernet - MPI - Profibus Adapter.

Delivery Includes:

IBHLink Adapter with PG socket (MPI/PPI/Profibus DP-Ethernet 12Mbaud)

Ethernet cable for Hub or Switch connection

An external power supply 24V DC required !

CD ROM with software drivers

Aspic 3.30 - single computer license upgrade from 100 I/O to 1000 I/O

If you bought the MPI Starter Kit and you want to configure more I/O, we can offer you 10% discount for upgrade to another Aspic 3.30 version.

Delivery Includes:

Aspic 3.30 single computer license - upgrade from 100 I/O to 1000 I/O

Software key (.exe file, size 44kB)

Price: **335 €**

Availability: 1 day

Code: 802-15
